Multiple Companies: One Cohesive Unit

Unique and powerful, Titan's Inter-Company Accounting feature enables multiple companies to work as one cohesive unit. Related companies can now be combined under one database while maintaining individual trial balances and financial statements.

Multiple companies can seamlessly process a single job in Titan. Sales and expenses will be automatically attributed to individual companies. Inter-company general ledger transactions can automatically be created, accurately reflecting "due to/due from" scenarios.

Sharing production resources, shipping resources, customers, vendors and product codes dramatically reduces database maintenance while increasing resource utilization.

All reports, including sales, receivables, payables, inventory, and financial reports, can be printed individually, by company or combined.
