## Titan 3000 Preferred Vendor Program: A Unique Opportunity for Precast Suppliers

**W**ith more than 250 precast plant locations and multiple users at most locations, the Titan 3000 Precast Management System is on-screen every day – all day – at plants across North America. As a supplier to the industry, now you can take advantage of that valuable computer screen real estate as a member of the Titan Preferred Vendor Program (PVP).

As a PVP member, your message can share the screen with the Titan plant management modules that precasters access for every aspect of their business operations – from initial planning, through production, QC, delivery and invoicing. As a Titan PVP member, your message can include:

- Your company logo
- A brief description of products and prices
- Contact information
- Website address

In this new business environment where it's not often possible to schedule face-to-face meetings with your customers, the Titan Preferred Vendor Program helps to keep your company name top of mind for influential Titan users at every company.

## Expand Your Marketing Horizons

To learn more about expanding your marketing landscape with Titan PVP, visit us at Booth #801 at The Precast Show 2021, May 20-22 in New Orleans, or contact:
