

PRECAST MANAGEMENT SYSTEM

TITAN

3000

Billions of dollars of precast quoted, produced and delivered every year – with Titan

Titan Online Lunch & Learns

The most comprehensive plant management software training in the industry just got even better! We have updated our Lunch & Learn program with a new series of topics designed to provide you with hands-on skills on some of the most important Titan 3000 features.

Lunch & Learn sessions are held online via Zoom and last 30 minutes to an hour, depending on topic. Instructors will focus on key features of a particular topic such as takeoffs, project management, inventory, accounting, mobile applications and more. Attendees should be able to immediately apply the new skills learned to their day-to-day use of the Titan system.

Topics for 2023 are listed below. To schedule Lunch & Learns, simply email the instructor listed with the class. Or, if you would like more in-depth training or custom training for your team, please contact Tom Reilly (treilly@muka.net) for details on available educational programs or call our office at **732-866-8686**.
