A Whole New Level of Asset Management

Increase the useful life of your equipment with Titan's Asset Manager module. Emphasizing maintenance, depreciation and costing, this module brings together key equipment processes into one integrated program.

Track and record all maintenance routines critical to the proper upkeep of your equipment. Track parts and labor from work orders while building an equipment costing history essential for future purchasing decisions.

Track and create depreciation entries critical for month end financial reporting purposes. Track and record equipment locations and other important data such as make, model, serial number, plate, color, status and condition.

In addition, documents and photos can be associated and tracked against any asset by utilizing Titan's Asset Manager and Document Management integration.

Bring your equipment management processes to a whole new level with Titan's Asset Manager module.

FEATURES
