

Titan 3000 Precast & Prestress Management System

Job Cost Processing

FEATURES

- » Monitor Job Phases
- » Track Job Cost Codes
- » Create Job Estimates
- » Record Actual Costs
- » Integrates with General Ledger, Purchase Order Processing, Accounts Payable, Payroll, Accounts Receivable, Inventory Management, CRM and Document Management
- » Analyze Estimate to Actual by Phase and Cost Code
- » Copy Job Estimate Utility
- » Issue Inventory
- » Certified Payroll
- » AIA Billing
- » Retainage Feature
- » Export Information to Excel or Word

The screenshot displays the 'Job Costing Screen' interface. At the top, there are fields for Job # (12-1172), Job Name (Job Cost Testing 110412), CustomerID (Fisher), and Name (Fisher Construction Corp.). Below these are attachment fields. A central panel shows 'Phase Status' (All), 'Phase Selection', 'Cost Type', and 'Cost Code' dropdowns. To the right, a summary table compares Estimate, Actual, and Variance for Income, Materials, Labor, Equipment, Sub, and Other. Below this is a 'Job Cost Codes / Estimate' table with columns for ItemID, Phase, Account(WIP), Cost Code, Account(CCS), Name, Description, Cost Type, Department, Cost Code Description, UOM, Est. Qty, and Est. Cost.

ItemID	Phase	Account(WIP)	Cost Code	Account(CCS)	Name	Description	Cost Type	Department	Cost Code Description	UOM	Est. Qty	Est. Cost
100	Section3	4000	A4050		Section 3 - North Wall	Other	642	Income A4000		EA	26.00	\$1,212.88

Tight Integration to Manage Project Costs

Titan's Job Cost Processing module manages costs on large-scale projects, small projects, and even capital equipment and facilities. General Ledger, Payroll, Accounts Payable, Purchase Order Processing, Inventory Management, Accounts Receivable, CRM and Document Management modules are all tightly integrated with the Job Cost Processing module.

Create job estimates and budgets by phase and cost code. Compare and analyze budgeted amounts to actual expenditures by individual cost codes or by phase. Copy job estimates by job or job template. Job notes and tasks can be assigned and monitored by individual or by task category.

Certified payroll reports can be generated with the Payroll Module. Retainage features are available in conjunction with the Accounts Receivable AIA billing features.

Filled with tools to manage your costs, Titan's Job Cost Processing module is essential for both large and small projects.
