Empowering Your Precast Sales Team

Titan's Customer Relationship Manager (CRM) was designed to empower the precast sales representative. The "Customer Dashboard" is the centerpiece of our CRM module and offers information that only Titan can provide.

Our Contact Management screen and Weekly Planner screen round out what is surely the most powerful CRM module in the precast concrete industry.

Sales representatives can now effectively organize their customer appointments, create "to-do" lists, email clients, and share all this information with fellow employees.

Our "Drill-down" feature allows users to quickly move between customers, contacts, jobs and quotes.

Titan's CRM...vital information at your fingertips.
