Titan 3000 Cloud Suite
Unleashing Precast Efficiency in the Cloud

WHAT IS TITAN CLOUD SUITE?

Titan 3000 Cloud Suite is the future of precast management, reimagined for the cloud era. Here's what sets it apart:

1. **Cloud-Powered Agility:** With Titan 3000 Cloud Suite, your precast operations are no longer bound by physical constraints. Access your critical data and tools from anywhere, anytime. Whether you're at the office, on-site or working remotely, Titan Cloud Suite ensures seamless collaboration.

2. **Remote App Experience:** Imagine having the power of Titan 3000 right on your desktop, but without the installation headaches. Titan 3000 Cloud Suite is delivered as a Remote App, providing a local application experience while harnessing the scalability and security of the cloud.

3. **Hosted by Experts**: Muka Development Group, LLC, a trusted name in software solutions, hosts Titan 3000 Cloud Suite on the Microsoft Azure cloud platform. Your data is safe, and performance is optimized.

4. **Integrated Features:** Titan 3000 Cloud Suite retains all the features you love from the desktop version. From order processing to financial tracking, it's a comprehensive solution tailored to your precast needs.

Why Choose Titan 3000 Cloud Suite?

- **Efficiency Unleashed:** Streamline your workflows, reduce manual tasks, and boost productivity.
- **Collaboration Made Easy:** Share project data with team members effortlessly.
- **Scalability and Security:** Scale up or down as needed, knowing your data is protected.

Contact the Titan team today and learn how to manage your entire operation – from anywhere!

Titan Cloud Suite: Your Competitive Edge – In the Cloud

Titan 3000 Modules: A Comprehensive Suite of Tools for Precasters

Titan 3000 isn't just a single tool—it's a suite of customized modules designed specifically for precast and prestressed concrete manufacturers. Here's a summary of the key modules:

1. **CRM (Customer Relationship Manager):** The heart of our CRM system, offering information only Titan can provide. Manage client interactions seamlessly.
2. **Quotes:** The Visual Takeoff module simplifies takeoffs and piecing up structures. A visual representation alongside your takeoff enhances accuracy.
3. **Visual Estimator:** Make estimating custom products easy and precise. View drawings while entering dimensions for accurate bill of materials.
4. **Sales Order Processing:** Efficiently handle orders, from creation to fulfillment.
5. **Production Scheduling:** Optimize production schedules for maximum efficiency.
6. **Dispatching:** Ensure timely deliveries to your clients.
7. **Accounts Payable Processing:** Manage payables seamlessly within the system.
8. **Accounts Receivable Processing:** Track and collect payments efficiently.
9. **General Ledger Processing:** Comprehensive financial tracking and reporting.
10. **Inter-Company Accounting:** Combine related companies under one cohesive unit.
11. **Document Management:** Organize critical files effortlessly.
12. **Inventory Management:** Keep track of your inventory levels and materials.
13. **Asset Mangement:** Track the maintenance, depreciation and costing of your assets in one integrated location
14. **Job Costing:** Monitor costs associated with specific projects.
15. **Equipment Tracking:** Track equipment usage and maintenance.
16. **Project Management:** Coordinate multiple projects seamlessly.

Seamless Integration with All Titan's Services

Titan 3000 Cloud Suite seamlessly integrates with other Muka Development Group software services, enhancing your overall precast experience:

- **QCTitan:** Reduces duplication of data, cuts down errors and makes your QC process more efficient. QCTitan is where quality control data flow is headed.
- **Contractor Hub:** An exciting service that strengthens the collaboration between the precaster and contractor. Through our secure internet hub, precasters and contractors can share up-to-the-minute information about their jobs – without making a phone call!
- **PickIt:** Timely product delivery is critical to every precast business. PickIT simplifies your staging needs by confirming that products scheduled for delivery have been fully produced and quality checked.
- **SignIt:** A Contractor Hub app, our new paperless delivery ticket mobile app allows truck drivers to get delivery tickets signed on the go right from the convenience of a phone or tablet.
- **NEW** **Precaster Hub:** A convenient and efficient way for team members to access data from the Titan 3000 system, no matter where they are. Whether you're a sales rep on the road, a production scheduler in the plant, or working from home – with the Precaster Hub you can have immediate access to all Titan information at your fingertips!
- **NEW** **SPOT:** SPOT is a tool to accurately and quickly take elevation and pipe location data off PDF plan sets for underground drainage and sanitary utility structures and import that data into Titan.
